SUMMARY

Front-End Developer with 3+ years building production web applications with React, Next.js, TypeScript and Vue, plus full-stack range across Node.js, Express and SQL Server. I own the frontend of Yekta Group's live platforms and the panels that run its operations, including the group ERP, from architecture to release. MSc Software Engineering student focused on scalable architecture.

EXPERIENCE

Front-End Developer | Yekta Group | Mashhad | October 2025 - Present (1 yr)
Own the frontend of heliumpark.ir and yekta-group.com, serving four venues across Mashhad and Tehran, with Next.js, React 19, TypeScript, Tailwind CSS and TanStack Query.
Delivered the full booking journey on heliumpark.ir: tickets and packages, VIP membership, events, group reservations, OTP login with token refresh, and online payment.
Lead invoicing and reservations across two admin panels (131 screens, 10 role-scoped workspaces), including Yekta Panel, live as the group ERP at erp.heliumpark.ir.
Designed and built a TypeScript, Express and SQL Server backend for task and document management: 42 modules, 258 REST endpoints, a 50-permission RBAC model and server-sent events.
Built Ezi, its frontend (React 19, Vite, TanStack Query): workspace messaging with a virtualized chat, a versioned archive and audit logs.
Built Yektafa, a brand website with its own admin and product catalogue on Next.js API routes and SQL Server.

Front-End Developer | Asiatech (Arman Tose'e Sayna) | Mashhad | September 2024 - January 2025 (5 mos)
Delivered Admin and Experts CRM applications with React, TypeScript and GraphQL, setting the component architecture the team built on.
Refactored complex features into modular custom hooks, making the codebase easier for the team to extend.
Developed a beauty salon reservation system with Next.js, Tailwind CSS and shadcn/ui, delivering a fast, responsive and accessible interface.

Front-End Developer | Arzesh Network | Mashhad | February 2023 - October 2023 (8 mos)
Developed data-entry and state-management features for a headless CMS in Vue and Vuex, documented for handover.
Designed and built a Learning Management System for quizzes and tests: creation, delivery and results tracking.

Front-End Developer Intern | Farawin | Mashhad | March 2022 - October 2022 (7 mos)
Rebuilt the Nasim Rezvan app in React, focusing on performance optimization for a real-time audio player.
Shipped a PWA for offline access and home-screen installation, enabling native-like use without a connection.

PROJECTS

novin.one | Online inquiry platform | 2025 | novin.one
Frontend for 23 banking, vehicle and government inquiry services with wallet and online payment; Next.js 15, TanStack Query, Zustand.

Frontend Interview Handbook | Open source | 2026 | frontend-handbook.sinabaradaran01.workers.dev
Bilingual (Persian/English) handbook from HTML to React, with live editable examples and full-text search; React 19, Vite, MDX.
