SUMMARY

Front-End Developer with 3 years of experience building production web applications with React, Next.js, TypeScript and Vue, plus full-stack capability across Node.js, Express and SQL Server. Currently owning the frontend of two live platforms at Yekta Group along with the internal admin panels that run daily operations, from architecture decisions through release. MSc Software Engineering student focused on scalable architecture, reusable component systems and measurable performance gains.

EXPERIENCE

Front-End Developer | Yekta Group | Mashhad | October 2025 - Present (1 yr)
Own the frontend of the group's two live platforms, heliumpark.ir and yekta-group.com, serving four entertainment venues across Mashhad and Tehran, using Next.js, React 19, TypeScript, Tailwind CSS and TanStack Query.
Delivered the full customer booking journey on heliumpark.ir: ticket and package purchase, VIP membership, events and group reservations, OTP login with automatic token refresh, and online payment with invoice tracking.
Lead invoicing and reservation work across two internal admin panels totalling 131 screens and 10 role-scoped workspaces for the cashier, coffee shop, accounting, support and management reporting teams.
Designed and built a TypeScript, Express and SQL Server backend of 42 modules and 258 REST endpoints for internal task and document management, defining the module architecture, a 50-permission RBAC model, real-time updates over server-sent events and encrypted attachments.

Front-End Developer | Asiatech (Arman Tose'e Sayna) | Mashhad | September 2024 - January 2025 (5 mos)
Delivered Admin and Experts CRM applications with React, TypeScript and GraphQL, establishing the component architecture and reusable patterns the team built on.
Refactored complex features into modular custom hooks, improving code clarity and making the codebase easier for the team to extend.
Developed a beauty salon reservation system with Next.js, Tailwind CSS and shadcn/ui, delivering a fast, responsive and accessible interface.

Front-End Developer | Arzesh Network | Mashhad | February 2023 - October 2023 (8 mos)
Developed data-entry and state-management features for a headless CMS built with Vue and Vuex, and documented key implementations to support handover.
Designed and developed a Learning Management System (LMS) for quizzes and tests, covering quiz creation, test delivery and results tracking.

Front-End Developer Intern | Farawin | Mashhad | March 2022 - October 2022 (7 mos)
Rebuilt the Nasim Rezvan app in React, focusing on performance optimization for a real-time audio player.
Shipped a PWA for offline access and home-screen installation, enabling native-like use without a connection.

SKILLS

Languages: TypeScript, JavaScript (ES6+), HTML5, CSS3, SQL

Frontend: React, Next.js, Vue 3, Nuxt, React Hook Form, Formik, Zod, Yup, PWA

State & Data: Redux Toolkit, TanStack Query, Pinia, Vuex, GraphQL, REST, Axios
